

FULL-SERVICE SOLUTIONS

APD's full-service capabilities have helped to save our clients time and money on projects ranging from fire stations to national retail stores to not for profit organizations.

APD has core competencies in:

- Architecture
- Civil Engineering
- Structural Engineering
- Mechanical Engineering
- Electrical Engineering
- Plumbing Engineering
- Fire Protection Engineering
- Prototype Design Programs
- FEMA Floodplain Management
- Land Surveying

DESIGNING TO YOUR NEEDS

Whether your project includes unique features, a decontamination layout and procedure, or a high tech command center which serves as the backup facility for the local 911 facility, we determine your needs and create a design that will endure.

We can include state of the art exhaust capture systems, fitness centers, training options, detox rooms, effective office space, and data centers.

Additionally, we pride ourselves in introducing cutting edge technology to help our clients save money on a long-term facility.

New construction materials, such as single-ply PVC roofing with faux standing seam ribs, allow for dramatic aesthetic appeal while seamlessly connecting to built-in gutters which prevent snow dams falling on exiting trucks.
